# BEEF INDUSTRY REVIEW AND CONSUMER INSIGHTS: FEBRUARY 2024 EDITION

Demand for beef has remained strong as consumers repeatedly claim they will continue purchasing beef, both in retail and foodservice settings. Consumers continue to rank beef as a top source of protein, superior in taste, nutritious, and good for social gatherings and special occasions. At the same time, the beef industry is observing some decline in demand, as retail sales begin to slip in terms of volume of beef sold while prices trend higher.

## **Consumer Self-Perceived Demand Drivers**

The Consumer Demand Drivers are based on self-reported consumer data collected through the Consumer Beef Tracker. The assessment was undertaken to determine what components are driving consumption, preference of one protein over another and the value of a protein.

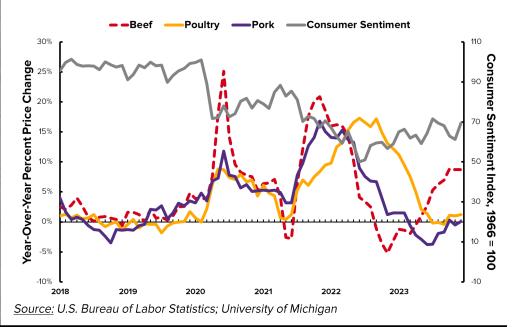

## BEEF PRICES AND CONSUMPTION TRENDS

All proteins experienced inflation volatility in recent years, with beef seeing annual inflationary increases approaching 9% in 2023.

In response to marketplace conditions, consumer sentiment, as measured by the University of Michigan, rebounded in 2023, up 11% from record lows experienced in 2022 albeit more than 15% below pre-COVID levels.

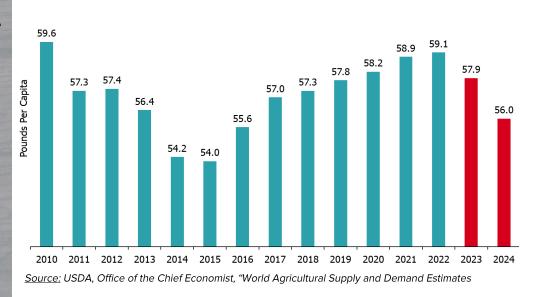

#### Inflation Rates of Popular Proteins vs. Overall Consumer Sentiment

Yearly Per Capita Net Beef Availability (in Pounds)

Beef is likely to face some softening through 2024, with contributing factors including contraction of the beef herd, ongoing drought, higher producer input costs, supply chain issues, and other factors.

Although beef remains a top choice in the marketplace, consumers have responded to increased prices with modest levels of substitution of other proteins.

## CONSUMER PERCEPTION OF BEEF PRICES

Consumer Price Willingness to Pay vs. Average Retail Price

While the price per pound consumers are willing to pay for steak held steady at just under \$9.00 in 2023, the retail price consumers are paying at the checkout counter is seeing record highs approaching nearly \$10.00 per pound.

Source: Consumer Beef Tracker, 2020-2023; NielsenIQ

Both chicken and beef are viewed as top value proteins among consumers although chicken consistently tops beef with respect to value for the money.

### Consumer Perception: Good Value For The Money

## CONVENIENCE AND VERSATILITY

Consumer Perception: Good for Many Types of Meals

--Beef --Chicken --Pork ---Meat Alt.

Versatility and value are key components of consumer demand for beef. Nearly half of consumers rank beef above other proteins for being good for many types of meals.

### Positive Beef Eating Experience

■ At Home ■ At a Restaurant

Whether dining out or eating beef at home, a majority of consumers report a positive eating experience when consuming steak, ground beef, or beef roast.

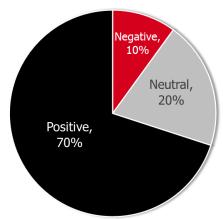

## **RAISED & GROWN**

Overall, 90% of consumers express a positive to neutral sentiment about beef as a protein.

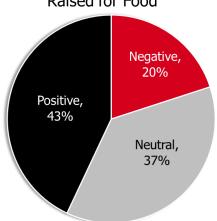

When considering how cattle are raised for food, 80% respond positive to neutral.

### Consumer Perceptions of Beef

## Perception of How Cattle Are Raised for Food

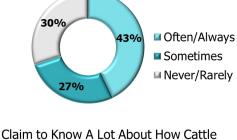

Source: Consumer Beef Tracker, 2023.

## Consumer-Claimed Production Knowledge

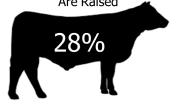

70% of consumers consider how food was raised or grown when making purchasing decisions, but less than 30% claim to have familiarity with how cattle are raised.

When asking consumers about specific concerns related to how cattle are raised for food, nearly 50% have no concerns while just 22% have concerns related to animal welfare.

## Top 10 Protein Considerations When Dining At Home

When deciding what protein to have with a meal at home, consumers prioritize taste, value for the money, and their budget.

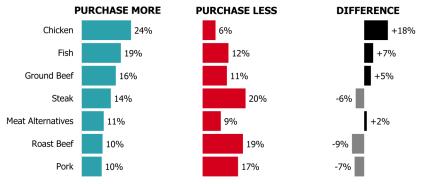

## **IN-STORE PURCHASING BEHAVIOR**

Reflecting inflationary pressures, consumers are looking to stretch their dollar noting an increase purchase intent of chicken, fish and ground beef while noting a decrease in steak and roasts.

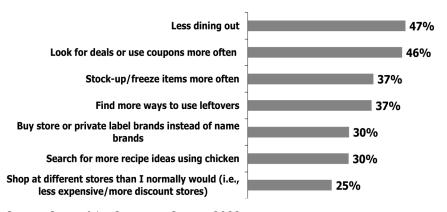

### Plans to Purchase More/Less of Compared to 2022

Source: State of the Consumer Survey, 2023.

Looking ahead to the next six months, nearly 50% of consumers anticipate dining out less and using coupons to maximize their dollar.

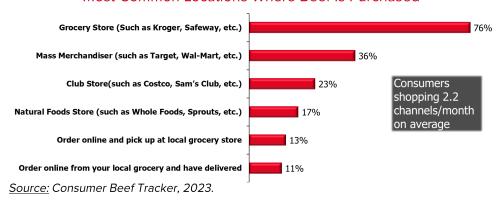

## Anticipated Changes to Shopping & Dining Habits in Next 6 Months

Source: State of the Consumer Survey, 2023.

When purchasing beef to eat at home, consumers are most likely to make purchases from a grocery store or mass merchandiser.

#### Most Common Locations Where Beef Is Purchased

BEEF RESEARCH

## **EVOLVING CONSUMER E-COMMERCE TRENDS**

Although over half of consumers are actively ordering groceries online, this trend is declining year over year as online ordering moderates and normalizes.

Online purchases of beef with grocery orders increased from 2020 to 2021 and has remained steady since at approximately one quarter of consumers doing so.

### Online Grocery Ordering Behaviors

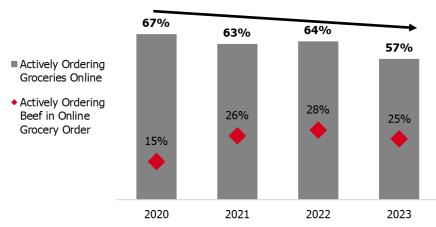

57% are ordering groceries online

## FUTURE MARKETPLACE EXPECTATIONS FOR BEEF

Brick and Mortar vs. Online Food Purchases

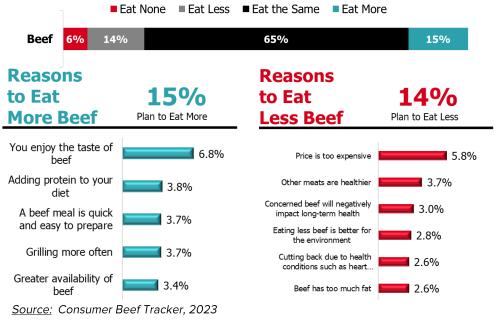

Looking forward to 2027, brick and mortar is projected as the dominant outlet for food purchases although steady growth in e-commerce is expected.

Source: Statista Market Insights, 7/1/23

Asked about future consumption of beef, 80% of consumers respond they will maintain or increase current levels, while just 14% are planning to eat less. Driving increased consumption of beef: taste, protein in the diet and quick and easy preparation.

## Future Consumption of Beef

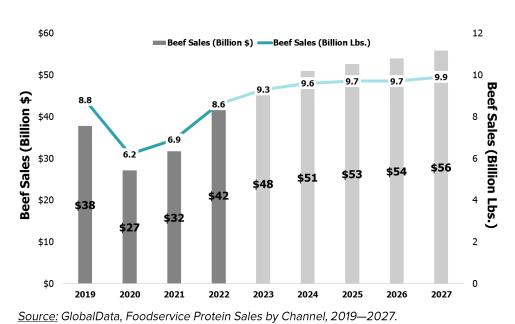

## BEEF PERFORMANCE AT FOODSERVICE

### Actual & Projected Beef Sales at Foodservice

As consumer inflation and market expectations normalize, beef sold at foodservice projected to grow through 2027.

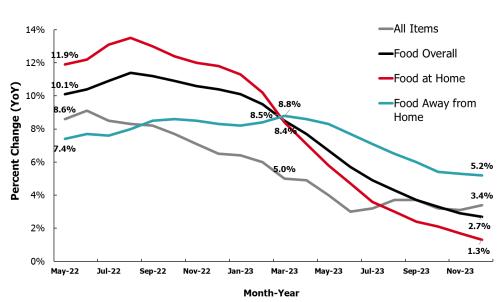

Food away from home (foodservice) inflation rates have stayed above food at home (retail) inflation rates for most of 2023.

However, since May of 2023, both food at home and away from home are showing annual inflationary declines. Perhaps more encouraging, food at home inflationary highs of August of 2022 are currently

below 2%, a noted contrast

of overall inflation levels.

<u>Source:</u> NielsenIQ, Discover, 2021 - 2023. January – December Fresh Beef Sales by Volume and Value, Data Ending 12/30/2023

## Retail Market Share by Primal

Fresh ground beef made up a majority of beef pound sales and occupies the largest share of beef dollar sales in 2023.

<u>Note:</u> The "Other" category is comprised of offals, other beef, ribs, and value-added products. <u>Source:</u> NielsenIQ, Discover, Year to Date Retail Protein Sales 52 weeks ending 12/30/2023

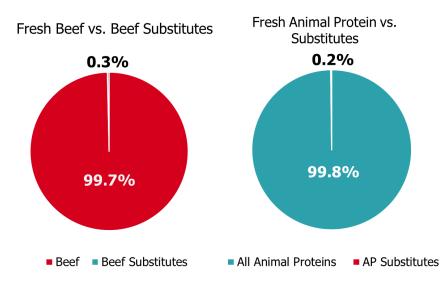

## MARKET SHARE OF FRESH MEAT ALTERNATIVES

Fresh meat and beef substitutes represent a small percentage of the fresh meat and beef markets. This trend has remained constant over the past few years.

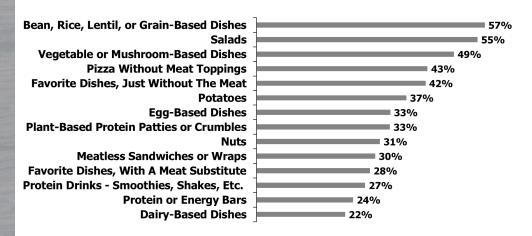

#### Market Share of Fresh Meat/Beef Substitutes

<u>Note</u>: Beef substitute forms include chubs, ground, and patties. Animal protein constitutes beef, bison, chicken, fowl, lamb, pork, turkey, and veal. Only <u>fresh</u> products were included in calculations. <u>Source</u>: NielsenIQ, Discovery. 2023 YTD Retail Protein Sales, 52 weeks ending 12/30/2023.

#### Items Consumers Eat Instead of Meat

When consumers choose to eat a meal that intentionally avoids meat, they are most likely to opt for dishes that don't traditionally contain meat such as bean, rice, lentil, or grain-based dishes and salads. Meat substitutes are less popular.

This report was compiled and analyzed by the National Cattlemen's Beef Association (NCBA), a contractor to the Beef Checkoff.
